

affinity™ series

HORIZONTAL DISCHARGE CONDENSING UNIT

Even if your home or lot is narrow, your choices aren't. Because with York's Affinity Series systems, it really is possible to find innovative, energy-saving home comfort technology in a unit perfect for small yards and zero-lot-line homes. Nothing's been left out. Nothing's been compromised. This is the same Affinity Series design—the same industry-leading performance and super-quiet operation—in a sleek model that will keep your home comfortable for years and years.

The big difference: the Affinity Series story.

York's Affinity Series line has been engineered from the ground up to offer you all-new options in heating and cooling. These are enhanced styles shaped with input from leading industrial and home designers, so there's a noticeable difference in looks. And, there's an all-new approach to saving energy with an emphasis on premium, super-quiet operation, so there's a noticeable difference in performance, too. The unique front-to-back airflow design moves air efficiently through the unit creating less turbulence for quieter overall performance.

Big efficiency.

Like all Affinity Series models, our condensing units meet or exceed federal government standards for energy efficiency. In fact, with our indoor variable-speed unit, you can choose up to 15.5 SEER[†] (Seasonal Energy Efficiency Ratio) for cooling that's exceptionally efficient. Even the Affinity Series blade design is new and different for greater efficiency and reduced sound.

Big durability.

Best of all, these little things are built to last. Interior parts are

corrosion-resistant so they hold up even in harsh seaside locales. Affinity Series Air Conditioning systems utilize micro-channel technology, making them long-lasting, light and easy to service. Also, this technology uses up to 50 percent less refrigerant, which is better for the environment. On the outside, each Affinity Series unit is painted with an automotive-grade powder coating for a look that's durable and extremely weather-resistant.

All that in one small, space-saving design. It's big deal.

Consumer benefits:

- Nominal 13 SEER (up to 15.5 SEER[†] when used with a variable-speed indoor blower)
- Zero-lot-line application; requires only a 6" clearance
- [MC]2^{®*} coil technology (up to 7 times greater corrosion resistance than conventional copper coils)
- High-efficiency scroll compressor and swept wing fan design for efficient operation and industry-leading sound quality
- Automotive-grade powder coating for long-lasting, attractive appearance
- High-quality cabinet construction for years of long-lasting, efficient performance

[†]Efficiency may vary by size and application. Contact your dealer for additional information.

*Microchannel coil technology utilizes all-aluminum materials for superior durability, performance and industry-leading corrosion resistance.

MODEL	DESCRIPTION	TONNAGE RANGE	REFRIGERANT	LIMITED WARRANTY
YCHD*	13 SEER	1.5 Tons–5.0 Tons	R410A	10-Year Compressor, 5-Year Parts

*Select models available in three-phase applications.

How to stay comfortable for years to come.

York and your York Dealer are proud to offer the YorkCare™ Comfort Plan. It's designed to maintain your system as well as your peace of mind. With up to 10 years of total coverage available, you can ensure your unit is effective and efficient for years to come.

What's more, your York Dealer offers maintenance agreements that provide upkeep while maximizing the warranty provisions. Ask about the YorkCare Comfort Plan. A little extra coverage is always a comforting idea.

Long story short: the history of York design.

You've probably enjoyed York engineering for years without even knowing it. We have, after all, designed and implemented heating

and cooling systems in some of the world's most famous structures, including the U.S. Capitol

building, India's Taj Mahal, the Sydney Opera House, the entire U.S. Navy

nuclear submarine fleet, and even venues such as your local mall and corner bank.

■ There's a reason people trust us with the big jobs. We've been doing this a long time. Over 130

years, in fact. In that time, we developed the first successful room air conditioner and cooled the world's first theater, hotel and office building.

We're constantly leading the industry in our design and our technology. And our commitment has earned our products

the Good Housekeeping Seal of Approval. No matter what the scale, chances are we've developed an efficient, durable and effective solution for it.

■ Which is all a way of saying this: You can depend on York to give you the choices you're looking for and

the designs that will keep you comfortable year-round, year after year.

■ Want to know more? Visit www.yorkupg.com or contact your York Dealer. They have 130 years of innovation to tell you about.
